Profile

Full-stack developer and AI generalist with a strong IoT background, exploring intelligent systems and scalable applications. Skilled in React, Node.js, MySQL, Arduino, and AI-driven solutions.

Project

Smart Street Light Monitoring System

Used Arduino, IR sensors, LDR module, and LEDs to automate street lights and monitor energy usage.

Lost and Found Portal for College (Link)

Developed a full-stack web Portal using React and Node.js to allow students to find their lost items for college.

Gift Registry System

Built with Express.js and MySQL; allowed users to create and manage gift wishlists, events, and reservations.

E-Commerce Website (Link)

Built a responsive shopping platform with product listing, cart, and checkout features using. Deployed on Netlify for live access.

Courses and Certification

Gained hands-on experience in prompt engineering, leveraging AI models, generative content creation, and building automated workflows with email integration. Gained practical expertise in building and deploying AI models through the immersive Google Exchange AI Program.
